TIRED OF MUD ON YOUR SPRAYER?

In muddy field conditions wide tires on your high clearance sprayer are a must. It used to be that you would need to own two sets of fenders - a wide set when using wide tires and a narrow set for narrow tires. The cost, switch time and storage space required for two sets of fenders adds up. With FenderXTender you can do away with having to own two sets of fenders. These quick-change rugged, polyethylene fender extensions are installed in less than 1 minute per fender beside your factory fenders using our patented bolt-latch design.

Minimal modification, maximum benefit

\$2100 per set
(plus shipping)

***Proudly invented and
manufactured in
Saskatchewan, CANADA***

Quick-change Bolt-Latch Design (patent pending)

Reduce the spread of clubroot and other soil-borne disease

Features

- Four “easy-on, easy-off” fender extensions for narrow fenders
- Solid, bolt-on connections
- Rugged polyethylene construction - no rusting or denting
- Install in under 60 seconds per fender with an impact wrench
- Minimal modification - extender brackets bolt on existing fenders
- Stackable for easy storage and handling

Advantages

- Improved protection from mud when using wide tires
 - *Reduced nozzle damage*
 - *Reduced mud-related corrosion and rust*
 - *Reduced labour and downtime in pressure-washing*
 - *Reduced field-to-field soil contamination*
 - *Faster sprayer cleaning to manage clubroot*
 - *Reduced risk of spreading soil-borne disease*
- Extensions easily removed when switching back to narrow tires
 - *Improved aesthetics*
 - *Reduced transport and storage widths*
 - *Reduced tall crop fender damage*

Benefits

- Easy to retrofit existing narrow fender machines to provide wide tire fender coverage
- Provides versatility - fender extensions can be quickly changed to match tire configuration
- Affordable - cheaper than owning two sets of fenders
